

By using **Microinvest eMenu Pro** I can browse the menu, check prices and place an order all by myself, without any involvement of the waiter, and then track the sum of the bill at any moment.

Graphic and appealing presentation of promotions, which are broadcasted on the screens with the help of free module **Digital Board** – is an excellent way to receive information regarding new and special offers.

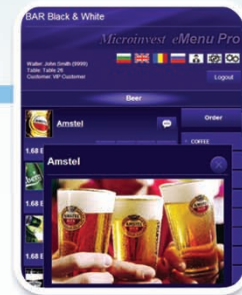

With **Microinvest eMenu Pro** I work twice as fast, and my tips have grown.

I can easily assign clients and tables to my user profile in the program, thus avoiding any confusion among the waiters.

New clients return much often, as they are attracted by the modern technology in the restaurant, and it is always nicer to serve familiar faces.

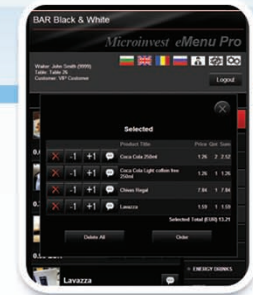

Automated updates of the information on prices, broadcast of the daily offer, special offers and promotions.

Convenient layout, prompt service with minimal involvement of the waiter.

Fast ordering. Assignment of tables and clients to a specific waiter.

www.en.microinvest.net

All placed orders are sent to the central sever through **WiFi** network, so they are carried out twice as fast.
