

My business is developing. I can add a new workplace and service more customers.
Microinvest retail solution adapts to my shop's needs.

I receive information in real time for all sales and keep track of all ongoing processes more efficiently.

The deliveries, sales, clients and partners data are entered in one database.

"My shop"

"My shop"

"My shop"

"My shop"

What do I need for second workplace?

Software Package:

- 1 **Microinvest Warehouse Pro Light - Retail** (front office);
- 1 licence for working with MSSQL database;
- 1 USB Hardware License.

This package is designed for store management (grocery or department) and contains all that is necessary for the manager's and the cashier's work. **Microinvest** software products provides the manager with control over all processes in the shop - deliveries, orders, sells at any time with no efforts at all. The offered package includes bonus software for archiving and security the data.

Notes:

The computer configuration is just an example. If you want to buy this package, contact us at e-mail: marketing@microinvest.net. You can use the software applications in demo regime with Access database 2.0 for upto 2 months!
