

# *Microinvest* eMenu Pro User Manual

2016

## **Microinvest eMenu Pro**

**Microinvest eMenu Pro** is a vanguard software system with a highly innovative interface. Owing to the fact that the system is realized as a WEB application, it has the ability to be used with any type of operating system. Moreover, the program has no system or hardware requirements.

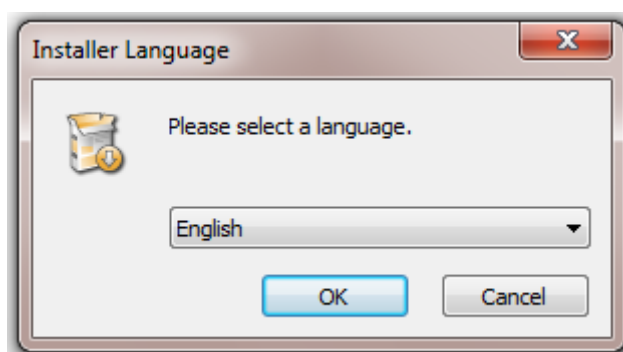

**Microinvest eMenu Pro** can be used as a customer-serving mobile restaurant system or as an electronic menu, providing clients with a detailed description of all the products and services, offered in a given retail or food and drink establishment.

The ability to define products into groups according to certain predefined criteria allows for the visualization of a higher variety of products on the screen of a standard peripheral device. The incorporated functionality for associating one device with only one selected worksite enables the devices to be placed directly upon the restaurant tables.

**Microinvest eMenu Pro** has an optimized and user-friendly installation wizard, which automatically runs and installs all components, necessary for the proper functioning of the program.

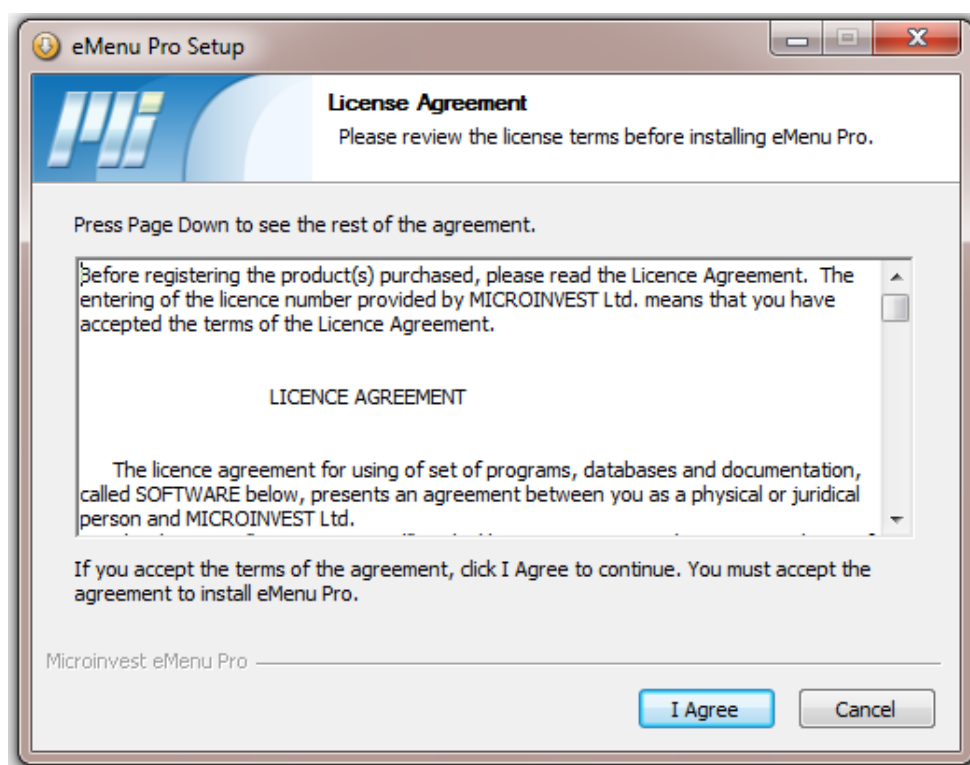

### **Product Installation**

The working language is selected in the first pop-up window.

In order to continue running the installation, you must read the licensing terms and conditions.

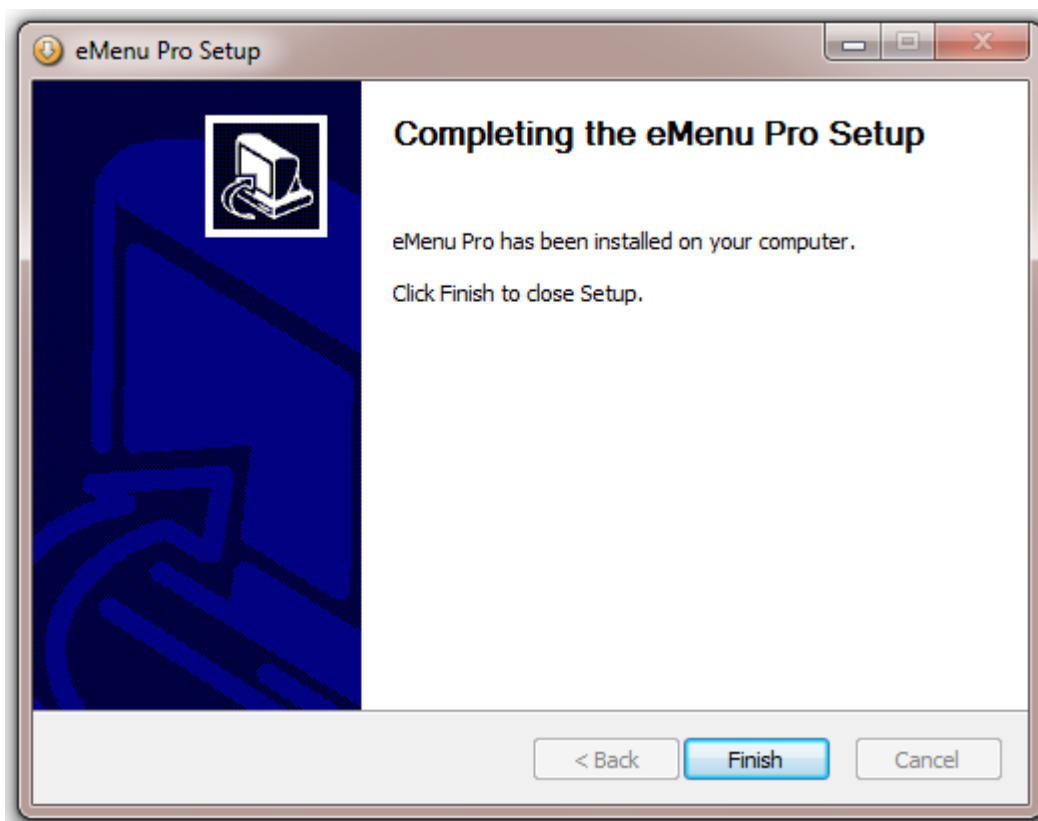

**Microinvest eMenu Pro** continues the installation with component unpacking in a default folder:

The installation finishes with clicking on the “**Finish**” button.

## Database Connection

In order to work with **Microinvest eMenu Pro**, the internal application for database connection must be configured.

First, the **Microinvest eMenu Pro Admin Icon** is initialized. The authentication window, in which the password for changing the settings must be typed, opens. The settings configuration and the operation of the program itself is accomplished via any internet browser, which enables the application to be used with any operating system, regardless of the system type.

The default password for the application is: **Admin**

A screenshot of a login window with a dark background. At the top, the word "LOGIN" is written in yellow. Below it, the text "Password:" is followed by a white rectangular input field. Under the input field is a button labeled "Login". At the bottom of the window, a message reads: "If you are using for the first time, please enter 'Admin'".

After the window for setup of the database connection appears, the type of database created by **Microinvest Warehouse Pro** is selected.

**Microinvest eMenu Pro** cannot administer a database by itself and does not work with a predefined database, respectively. When choosing the type of server (two server types are supported – MySQL and MSSQL), the following blank fields must be filled in:

- Server
- Name of database
- Database user
- Password for connecting with the database

In the “**Server**” field, the name of the server, as well as its IP address, can be typed in. The rest of the parameters are filled analogously to the settings in the back-office program (*Microinvest Warehouse Pro*).

The screenshot displays the 'Administration Panel' for 'Microinvest eMenu Pro'. At the top, there are flags for Bulgaria, UK, and Russia, along with a 'Logout' link. Below the header, there are two tabs: 'eMenu Pro' (selected) and 'eStatistics Pro'. The main content area is titled 'Edit Database Settings!'. It contains the following fields:

- Server Type:** A dropdown menu with 'MS SQL' selected.
- Server:** A text input field containing 'localhost'.
- Database Name:** A text input field containing 'eMenu'.
- Database User:** A text input field containing 'sa'.
- Database Password:** A text input field with masked characters (dots).

Below these fields is a 'Save' button. At the bottom of the main area is a 'Back' button. On the right side, there is a vertical sidebar with buttons for: Home, Database Connection, Config, Categories, Products, Comments, Print Settings, Product License, DIGITAL BOARD, and eCatalog.

After the database is loaded, on the screen will be visualized the **Home** screen of the administration panel. Here, you can read all the updates in the last versions.

**Administration Panel** Logout

**eMenu Pro** **eStatistics Pro** *Microinvest eMenu Pro*

**Welcome in Microinvest eMenu Pro v. 3.07.017**

Last changes:

- Microinvest eStatistics Pro - added a new module for graphical analysis. The module can be accessed at: <http://localhost/eMenuPro/reports.php>
- Microinvest eCatalog - added new module, which enables very easy integration between exciting public web site and Microinvest eMenu Pro in a way that in the public web site will be visualized the product groups and the products from Microinvest Warehouse Pro database, using the same descriptions and pictures as in Microinvest eMenu Pro.
- Fixed inconsistencies when working with MySQL 5.5

**Microinvest eMenu Pro v. 3.07.016**

Changes:

- DIGITAL BOARD - the item price is uneditable and is automatically updated from Microinvest Warehouse Pro database. Once the presentation is started, it is needed to be made a "REFRESH" for the respective URL.
- To start the presentation, administrator password is not required.

**Microinvest eMenu Pro v. 3.07.015**

Changes:

- Optimization in the printing of non-fiscal receipts.

**Microinvest eMenu Pro v. 3.07.014**

Changes:

- Digital Board - the module gives you the opportunity to create your own presentations of the products you offer only in few minutes
- Completely new design and layout of the administrative panel.
- New functionality for manual ordering of items' group.
- New functionality for manual ordering of items according to customer's will. Added language selection option in the administrative panel.
- All data, except the pictures, are recorded in additional tables in Microinvest Warehouse Pro database.
- Improvement in the licensing procedure of Microinvest eMenu Pro Improved system for messages and additional notes

**Important!** We highly recommend the usage of browsers which support CSS3 standard, i.e. Mozilla Firefox, Google Chrome, Opera, Safari. If you use Internet Explorer, the version should be lower than Internet Explorer 10.

## Interface Configuring

After a connection between **Microinvest eMenu Pro** has been established, the visual style of the interface can be changed in the **Config Menu**.

The screenshot displays the 'Administration Panel' for 'Microinvest eMenu Pro'. The top navigation bar includes 'eMenu Pro' and 'eStatistics Pro' tabs, along with flags for BG, EN, RO, and RU, and a 'Logout' link. The main content area is titled 'Edit Config' and contains several configuration options:

- Restaurant Title: Restaurant Black and White
- Admin password: Admin
- When the category is not selected, show products from: Coca Cola
- Sort products by: Manual sorting
- Prices format: 0.00
- Method of identification: Password
- Do not show thumbnail images: No
- Application mode: Restaurant menu
- Please, select a language: BG, EN, RO, RU (all checked)
- Default Language: EN

Below these settings is a section titled 'Restrict user to see only a group of partners' with a table for 'User' and 'Partner' and an 'Add restriction' button. At the bottom of this section are five thumbnail images of the eMenu interface in different themes: Black, Blue, Green, Red, and Purple. The 'Black' theme thumbnail is highlighted with a red border. A 'Save' button is located below the thumbnails, and a 'Back' button is at the very bottom of the configuration area.

On the right side of the panel is a vertical menu with the following items: Home, Database Connection, Config, Categories, Products, Comments, Print Settings, Product License, DIGITAL BOARD, and eCatalog.

In the menu **Config** might be edited different config settings such as: Restaurant Title, Admin password, Price format, Application mode and so on.

The screenshot shows the 'Administration Panel' for 'Microinvest eMenu Pro'. The 'Edit Config' window is open, displaying various settings:

- Restaurant Title:** Restaurant Black and White
- Admin password:** Admin
- When the category is not selected, show products from:** Coca Cola
- Sort products by:** Manual sorting
- Prices format:** 0.00
- Method of identification:** Password
- Do not show thumbnail images:** No
- Application mode:** Restaurant menu
- Please, select a language:** BG, EN, RO, RU (all checked)
- Default Language:** EN

At the bottom of the 'Edit Config' window, there is a section titled 'Restrict user to see only a group of partners' with a table:

| User | Partner |
|------|---------|
|      |         |

An 'Add restriction' button is located below the table.

On the right side of the 'Administration Panel', there is a sidebar with the following menu items: Home, Database Connection, Config, Categories, Products, Comments, Print Settings, Product License, DIGITAL BOARD, and eCatalog.

There is an option for enabling limitations for the users, which are restricted to see certain groups of users:

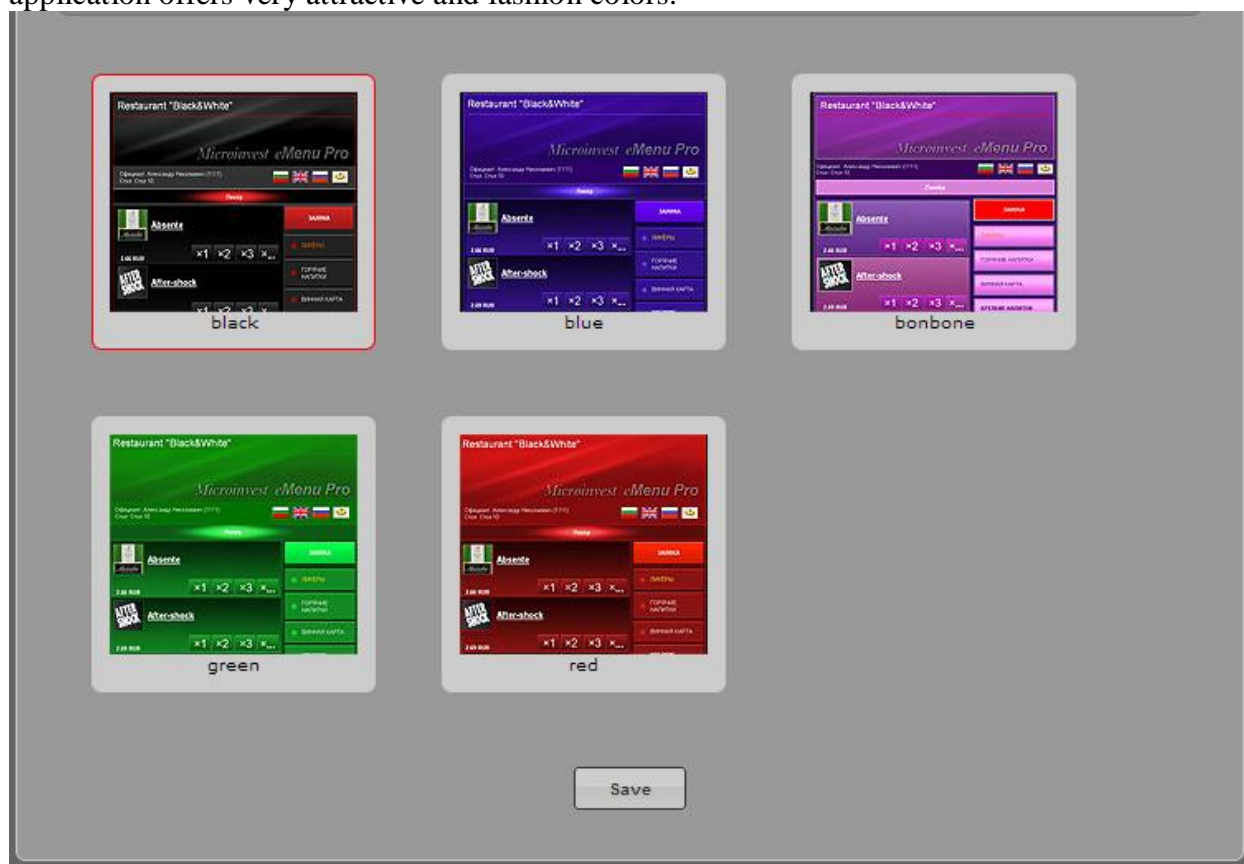

The screenshot shows the 'Restrict user to see only a group of partners' window. It contains a table with two columns: 'User' and 'Partner'.

| User         | Partner   |
|--------------|-----------|
| Operator1    | Suppliers |
| Default user | Customers |

A dropdown menu is open for the 'Default user' in the 'User' column, showing the following options: Default user, Manager, Operator1, and owner. An 'Add restriction' button is located at the bottom right of the window.

In the menu **Config** might be selected and the visual style of the user interface. The application offers very attractive and fashion colors:

In the “**Categories**” menu, there is a possibility to hide “**Product Groups**”, i.e. to make them invisible for the customers through placing a tick in the “**Exclude**” column.

(EN) Product Title:  
Coca Cola /500 ml/

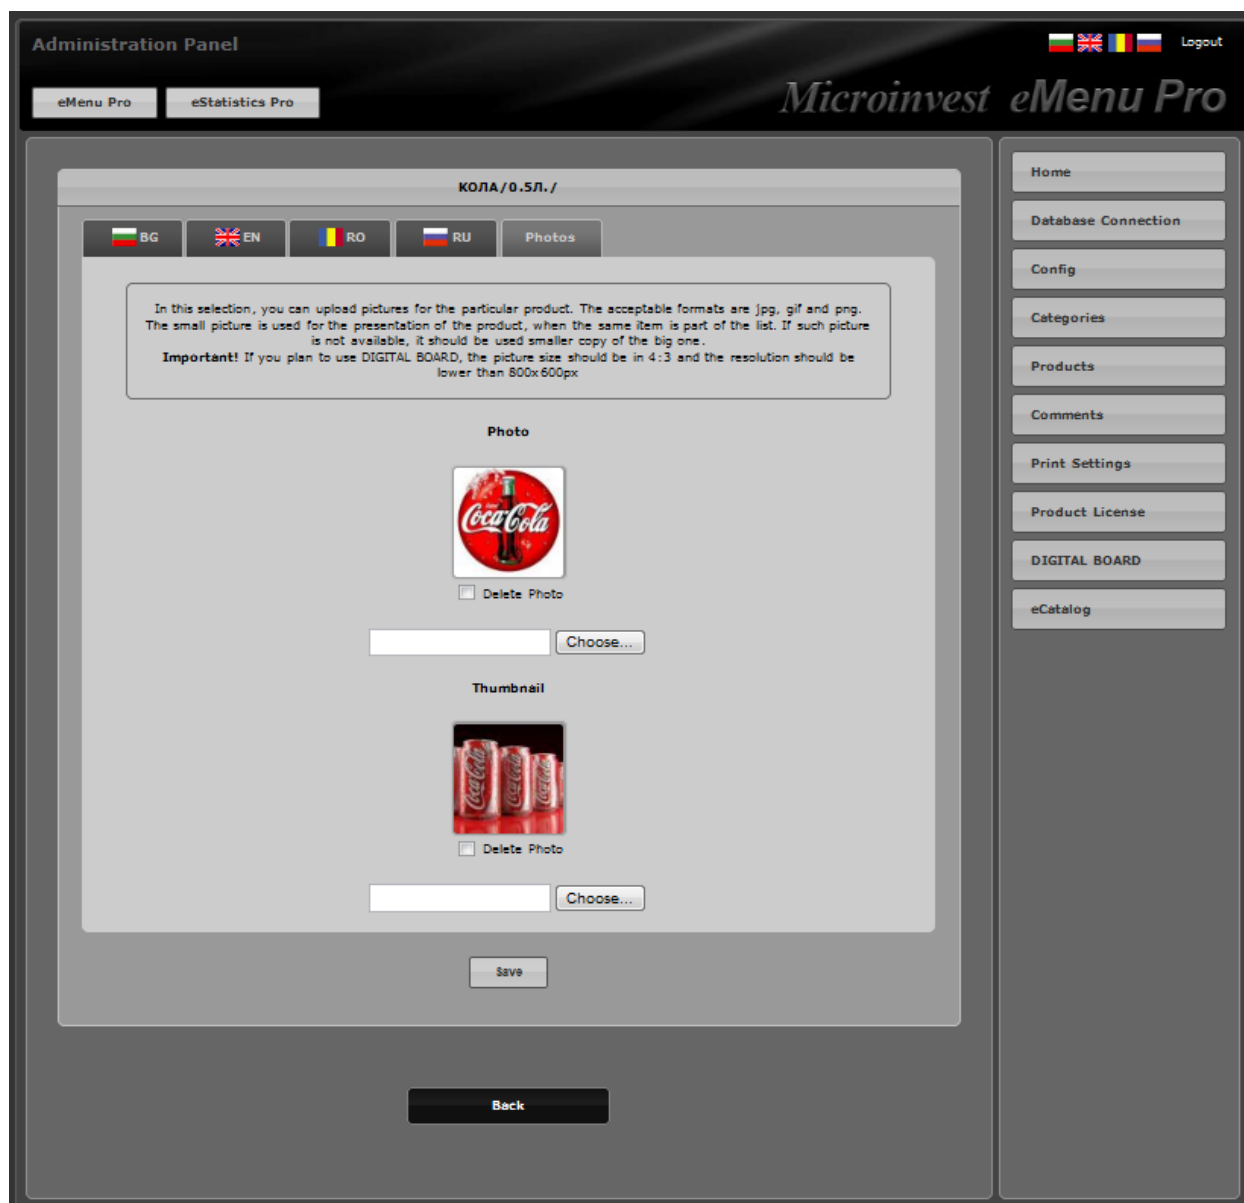

(EN) Description:

(EN) Short description that is going to be used in DIGITAL BOARD:  
Coca-Cola is a carbonated soft drink sold in stores, restaurants, and vending machines in every country except Cuba and North Korea.[1] It is produced by The Coca-Cola Company of Atlanta, Georgia, and is often referred to simply as Coke (a registered trademark of The Coca-Cola Company in the United States since March 27, 1944). Originally intended as a patent medicine when it was invented in the late 19th century by John Pemberton, Coca-Cola was bought out by businessman Asa Griggs Candler, whose marketing tactics led Coke to its

To upload or delete pictures of the products, please click on the tab Photos.

A big and a small sized picture can be uploaded. In the standard appearance, the small picture is visible and, with a mouse click, a second window appears with the bigger picture and the inserted product description. This description can be in any of the 4 languages – Bulgarian, English, Romanian or Russian. Such functionality enables clients who use **Microinvest eMenu Pro** directly, not through a waiter, to receive more detailed information for a selected product item.

There are no restrictions as to the size and format of the pictures, which can be attached to the product items, since the program performs automatic resizing and reformatting. The recommended picture size is:

- Small – 120 x 120 pixels
- Big – 480 x 360 pixels

The acceptable formats of the pictures are jpg, gif and png.

**Important!** If you plan to use Digital Board, the picture size should be 4:3 and the resolution should be lower than 800\*600px.

To enter comments on the four languages for the products, select the menu Comments from the right side bar.

The screenshot displays the 'Administration Panel' for 'Microinvest eMenu Pro'. At the top, there are tabs for 'eMenu Pro' and 'eStatistics Pro', and a 'Logout' button with flags for Bulgarian, English, and Russian. The main content area is titled 'Comments' and contains a text box with instructions: 'In this section you can enter comments, which after that can be added to a certain row of the order. For example: without salt, without spice ...'. Below this, there are four input fields for comments in different languages: 'Comment (BG)' (containing 'Коментар БГ'), 'Comment (EN)' (containing 'Comment EN'), 'Comment (RO)', and 'Comment (RU)'. A 'Save' button is located below these fields. At the bottom of the main area is a 'Back' button. On the right side, there is a vertical sidebar with a list of menu items: 'Home', 'Database Connection', 'Config', 'Categories', 'Products', 'Comments' (which is highlighted), 'Print Settings', 'Product License', 'DIGITAL BOARD', and 'eCatalog'.

In Print Settings should be entered the following settings for printing:

The screenshot shows the 'Administration Panel' for 'Microinvest eMenu Pro'. At the top, there are tabs for 'eMenu Pro' and 'eStatistics Pro'. The main content area is titled 'Print Settings' and contains a text box with instructions: 'Here, you can create configuration files and after then in the settings for each device (tablets) choose, which of them to use.' Below this is a 'New configuration' button. A table lists the existing configurations:

| No | Config File | Delete  |

It is used only in mode "Menu Restaurant". Here you can create different config files. From the tablet settings you can select which config file to be used (this option is very useful for restaurants with different halls and floors and if you have on each floor a bar. When ordering a drink from a table from the 1<sup>st</sup> floor, the order is sent automatically to the bar printer on the first floor and if you have food order, it goes to the kitchen printer and so on).

## Licensing

Product License is described in the **Licensing Terms and Conditions** of **Microinvest eMenu Pro**. In the 5 blank fields, the 25 digit license code for registering the program is filled in.

Administration Panel Logout

eMenu Pro eStatistics Pro **Microinvest eMenu Pro**

Before registering the product(s) purchased, please read the Licence Agreement. The entering of the licence number provided by MICROINVEST Ltd. means that you have accepted the terms of the Licence Agreement.

**LICENCE AGREEMENT**

The licence agreement for using of set of programs, databases and documentation, called SOFTWARE below, presents an agreement between you as a physical or juridical person and MICROINVEST Ltd.

The document "Registration card" applied by MICROINVEST Ltd. is an integral part of the present Licence agreement.

The SOFTWARE distributed by MICROINVEST Ltd. is protected by the Copyright and Related Rights Treaties. For the purposes of this text "documentation" means printed materials and/or computer files containing description of the Software components that are an integral part of it.

**1. Subject of the Licence Agreement**

1.1 The subject of this Licence Agreement for software is a non-exclusive licence for using of SOFTWARE transferred from MICROINVEST Ltd. upon the end user.

1.2 All clauses of this agreement have a bearing on the SOFTWARE as a whole as well as on its separate components.

**2. Copyright**

2.1 MICROINVEST Ltd is the exclusive owner of the copyright upon this software.

2.2 As an end user you receive a licence for using the SOFTWARE if you accept all clauses of the present Licence Agreement.

2.3 The licence is given exclusively and only to you except if another additional permit is given by MICROINVEST Ltd.

The server used for the printing also needs to be defined in the settings of **Microinvest Warehouse Pro Light** (menu Setup->Main> Print server).

When an order is entered, the quantity is specified with the help of the numbered buttons (x1, x2, x3...), and when clicking on the name of the product, a window with a bigger product item picture and a detailed description of it, appears:

## Restaurant "Black&White"

1.68 F

1.68 F

1.68 RUB

The Amstel is a river in the Netherlands which runs through the city of Amsterdam. The river's name is derived from Aemestelle, old Dutch for "area abounding with water".

Amstel beer is named after the river. The Amstel brewery, as a lot of other breweries, was situated close to the Amstel river because clean river water was used to produce the beer.

After that the order can be either accepted or rejected:

### Selected

|  |    |    |  | Product Title | Price | Qty | Sum  |
|--|----|----|--|---------------|-------|-----|------|
|  | -1 | +1 |  | Heineken      | 1.68  | 3   | 5.04 |
|  | -1 | +1 |  | Amstel        | 1.68  | 2   | 3.36 |
|  | -1 | +1 |  | Carlsberg     | 1.68  | 1   | 1.68 |

Order

If accepted, a window for viewing the ordered products and the value of the order pops out.

### Ordered

| Product Title    | Price | Qty | Sum  |
|------------------|-------|-----|------|
| Heineken<br>( )  | 1.68  | 3   | 5.04 |
| Amstel<br>( )    | 1.68  | 2   | 3.36 |
| Carlsberg<br>( ) | 1.68  | 1   | 1.68 |

**Ordered Total (RUB) 10.08**

**Microinvest eMenu Pro** is applicable for being both a purely informative electronic menu without an active module for ordering, and being a module for entering of orders on behalf of an operator. The latter leads to a direct transfer of the quantities for fulfilling the order with consequent printing, taking place on the predefined printing devices.
